BUCKETS**WORKTOOLS**

First worktool must ordered as installed,no packing reference required.

Additional buckets must be ordered as 'not installed' and should include packing reference OG-3281

Please note: Japan dealers cannot order additional worktools due to shipping reasons.

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.

Offered with:

- 1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
- 2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging.

All 910/914 PS General Buckets share the following characteristics:

Single piece bolt-on cutting edge = 2400mm / 95" wide

8x bolt on adaptors & long tips = 2430mm / 95" wide

Performance Fill Factor = 110% (or 0.1cum/0.2cyd) of stated capacity.

For correct bucket selection see OMM/specalog which shows max material densities per machine configuration per bucket size.
